

**The new Viking Motor Yacht.  
Where luxury takes on new dimensions.**

viking yachts

With the 50', Viking brings all of its legendary luxury, style, performance and construction technology to the mid-size range, creating a whole new class of motor yacht. There's nothing like it.

**THIS NEW VIKING OFFERS THE MOST USEABLE SPACE OF ANY 50' MOTOR YACHT.**

For openers, the new Viking is a true 50' flush-deck motor yacht. She offers the unparalleled luxury of three full levels of accommodations: three state-rooms, three heads, three entertaining areas, a spacious galley with dinette, an open aft deck, a crowd-pleasing fly-bridge deck and a

full-height, sound-insulated engine room. All in a maneuverable length of 50'.

**Built in the Viking high-technology tradition.**

The 50' exemplifies the standard of excellence that has made her larger sister ships so justly famous throughout the world.

This new 50' incorporates all the latest Viking high-tech engineering. The hull is built of advanced materials including knitted fabrics, pre-preg composites and high-tech coring. This aerospace technology ensures great strength with low weight and a low center of gravity. Computer-controlled design and testing of the hull—pioneered by Viking—means the Viking 50' delivers a stable, soft ride with none of the conventional motor yacht compromises in handling, efficiency, and speed.

**Elegance befitting your sea-going home.**

Luxury is a watch word at Viking, and on the 50' you'll experience it inside and out.

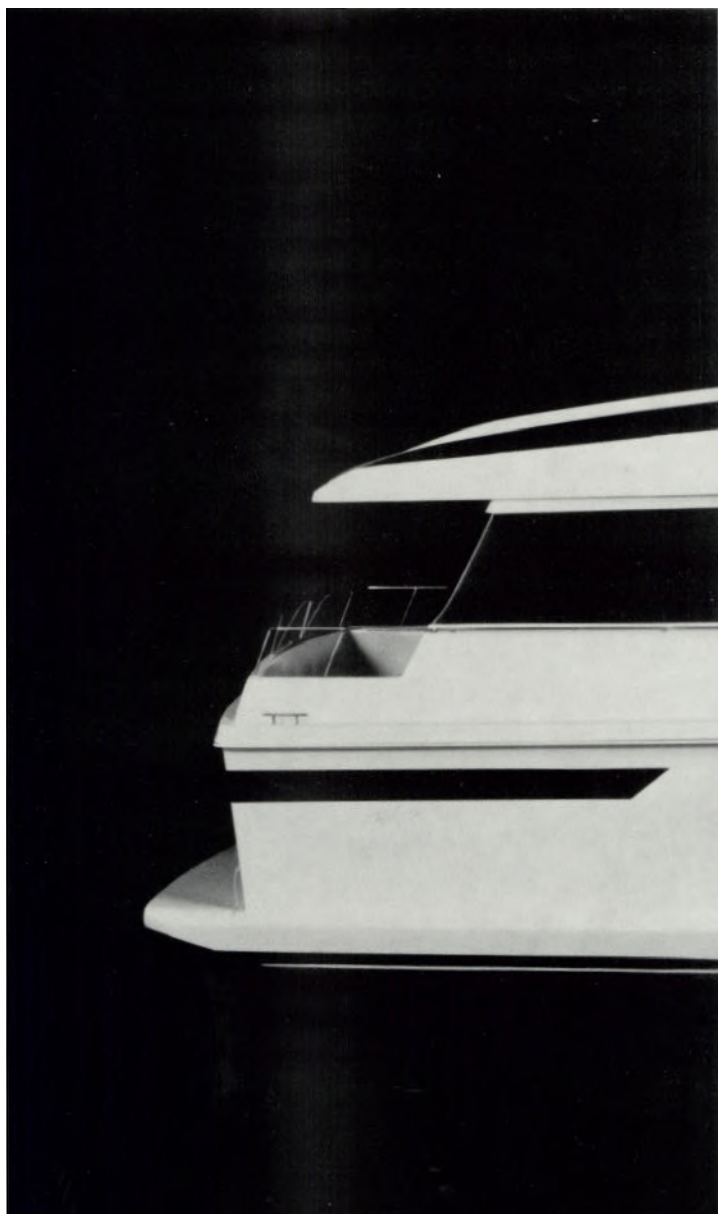

There is simply no yacht in its size class that offers so much useable space, both for daily living and for lavish entertaining.

Forward on the main deck is a fully equipped gourmet galley with L-shaped dinette; there are sliding doors port and starboard. Just aft of the galley is the grand salon: gracious living at its finest. This living room-sized space is luxuriously detailed in teak and boasts a full entertainment center with television, as well as AM/FM stereo and cassette deck. Expansive sliding glass doors lead to the 86 sq. ft. open aft deck.

On the aft deck, there's room for elegant entertaining in the open. When used in conjunction with the spacious salon, the 50's open deck creates an indoor/outdoor atmosphere rivaled only by mega-yachts. That's because Viking believes that the essence of yachting is the luxury of space.

Go forward from the salon and follow the stairway down to the stateroom deck. There you'll discover two comfortable guest staterooms: the forward suite accommodates upper and lower berths with private head and shower. The guest suite amidships is even more impressive, comparable in size to the master suite on larger motor yachts. It is furnished with a queen-sized walk-around bed, spacious hanging cedar lockers, built-in teak bureaus and its own private head with shower.

A stairway from the salon leads down to the

50's piece de resistance, the master suite. From its king-sized bed to spacious double hanging cedar lockers, the feeling is easeful luxury. Pamper yourself in the private head's bathtub with optional jacuzzi.

An optional floor-to-ceiling entertainment center fully equipped with color TV, AM/FM stereo and cassette deck is available for either the master suite or the mid-ship guest suite.

Amidships is the acoustically isolated, full-height, full-beam engine room, intelligently designed with plenty of room for easy engine walk-around. The engine room houses your choice of diesel powerplants: twin 6V92's or twin 8V92's.

**The Viking 50' wins the space race.**

The Viking 50' is designed to feel as roomy as many mega-yachts. For its size, it boasts the most useable interior space of any motor yacht in the world. Its intelligent layout far outshines the corn-

petition in utility and functionality. Both the elegant salon and the modern galley outsize the competition; in fact, in every area, from the master suite to the guest staterooms to crucial storage, the Viking 50' outflanks the competition easily.

**View from the top.**

The extended flybridge deck accommodates a dozen guests for open-air entertaining. The state-of-the-art helm will make commanding the 50' a pleasure. (An optional lower helm is available.) There's plenty of room up here for a full-sized tender, if you wish.

While the space and accommodations of the 50' rival many much larger yachts, her performance exceeds that of many smaller boats. That makes the Viking 50' worthy of serious consideration for anyone serious about luxury motor yachts.

**A true mega-yacht  
in every dimension but length.**
