VIKING 72'
MOTOR YACHT

THE 72' DINING/SALON LAYOUT CREATES
AN AMAZING SENSE OF SPACE

If you're among the select few considering a motor yacht in the 70' plus range, first you must decide between a custom or a production yacht.

Too many production boats offer stodgy appearance...and performance to match. On the other hand, production boats should offer more advanced design and production technology, but only Viking truly lives up to this expectation.

Utilizing what *Boating* magazine called "the most dramatic application of new technology in

the world of marine design," Viking has produced a 72' yacht that responds and handles like a *far* smaller boat, built with the same rock-solid reliability that made Viking famous.

Through its maximally efficient use of space, the interior of the 72' feels like a *far* larger yacht. Its intelligent open area layout directly joins a huge aft deck to create the luxury of true indoor/outdoor entertainment.

The 72's exquisite details, from hand-made

cabinetry to a party-sized bridge, reflect a level of quality found only on custom yachts. Viking will tailor the decor of the 72' to satisfy the most discriminating tastes.

Production or custom? On the Viking 72' Motor Yacht, you get the very best of both.
